### **DETAILED ACTION**

This application filed March 6, 1997, is a continuation of 08/217,921, filed March 25, 1994, now US Patent 5,690,926, which is a continuation in part of 07/958,562, filed October 8, 1992, now US Patent 5,453,357.

Applicant's amendment filed June 30, 2006 has been received and entered. Claims 1-3, 5-41, 43 have been canceled. Claims 4, 38, 42 and 44 have been amended. Claims 4, 38, 42 and 44 are pending and currently under examination.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 4, 42, 44 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7, 15, 18-21, 23-28 of copending Application No. 10/327,400 is withdrawn.

This application is in condition for allowance, and will be allowed to go to issuance over the junior application.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4, 42 and 44 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement is withdrawn.

The claims have been amended to recite and encompass a specific cell type generally disclosed, and specifically provided in the working examples of the present disclosure.

Claims 4, 42 and 44 rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is withdrawn.

As noted above, the claims have been amended to recite and encompass a specific cell type generally disclosed, and specifically provided in the working examples of the present disclosure.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The claims have been amended to reflect clearly a PGC cell line derived by methods enabled by the present disclosure. At the time of filing, general methods for isolating PGC cells

were known, and reduced to practice for the mouse. However, the prior art fails to specifically anticipate or make obvious the cell type provided in the present disclosure, and encompassed by the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
